We now select "Choose Value Tower Servers."

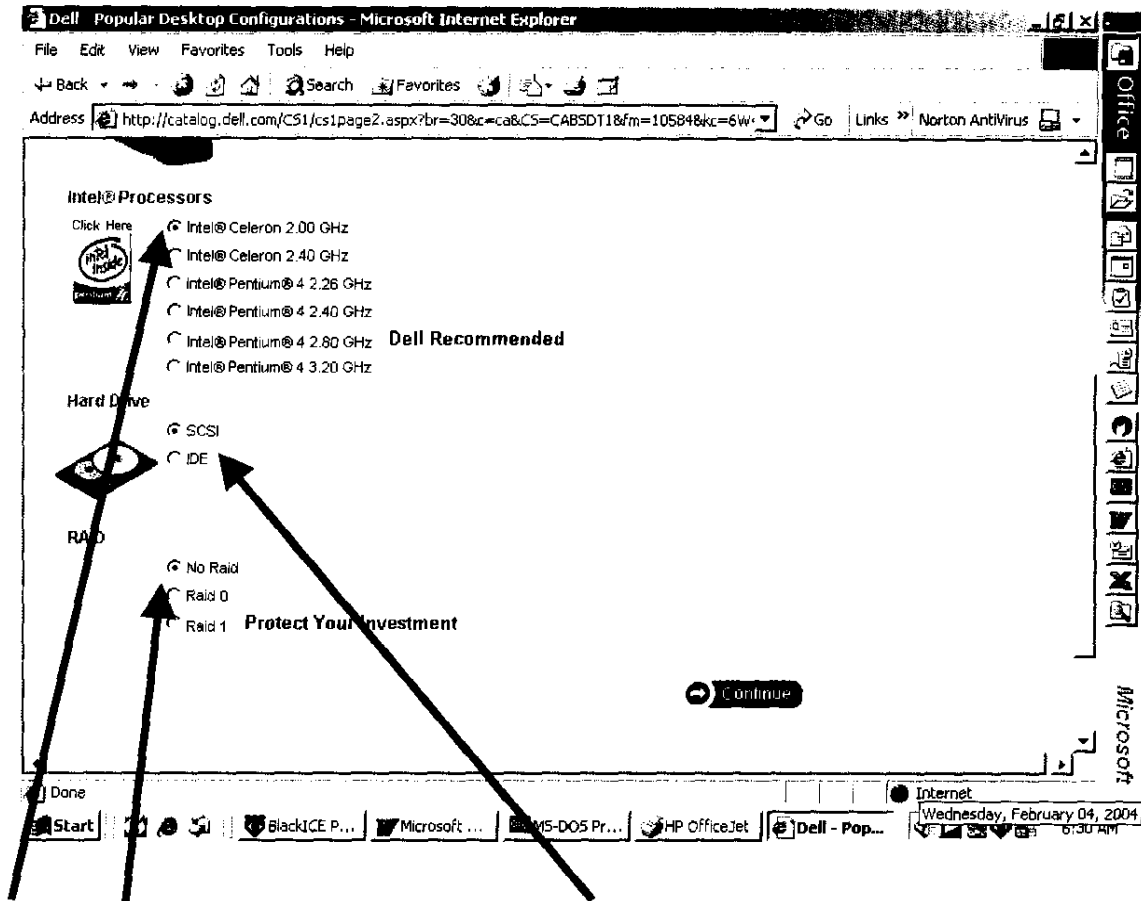

We now select the base server to customize and configure. The 400SC page 1 of 2 for web content.

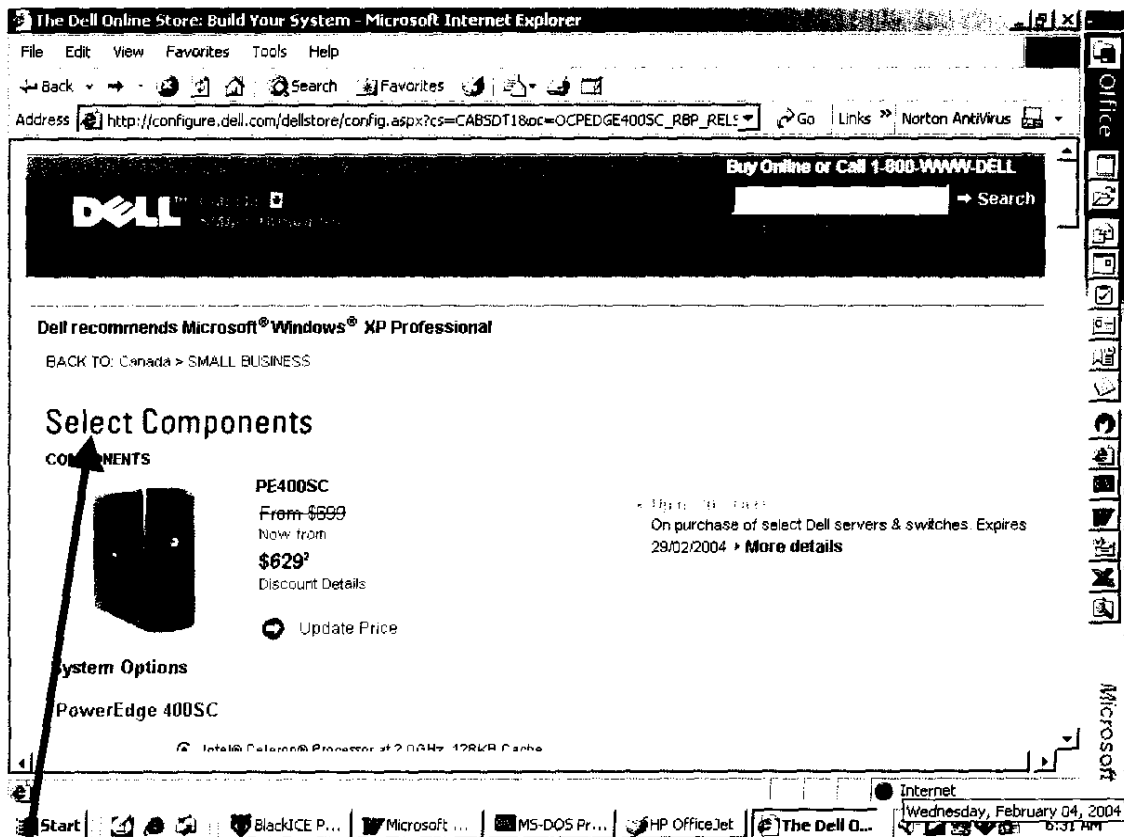

We select the "Customize It" button. Page 2 of 2.

We are now at the base system and can begin to select our customizing options. On this screen shot we bullet the option Intel Pentium 4 2.26 GHz. Page 1 of 2 for web page content.

We continue our customizing by changing our previous selection and settle on the Intel Celeron 2.00 GHz processor, SCSI Hard Drive and no RAID on the previous page the Intel Pentium 4 selecting a SCSI hard drive

We are now prompted to continue our customizing by selecting various components. Page 1 of 10 for web page content.
